ACTION PLAN Helping Babies Breathe

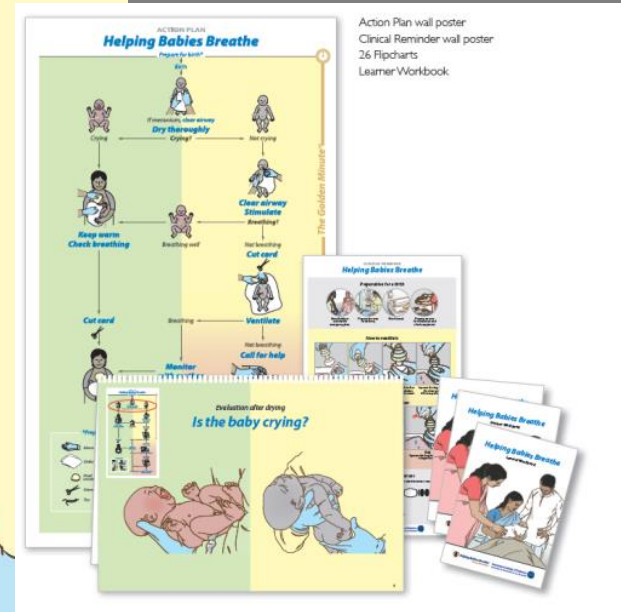

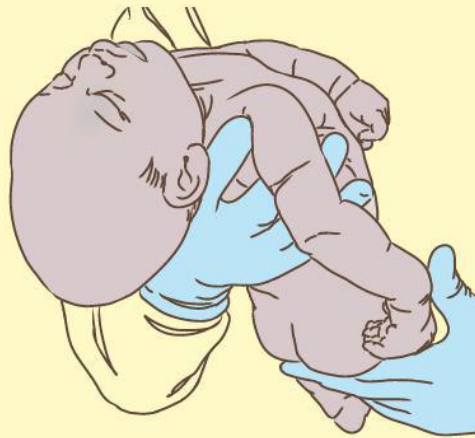

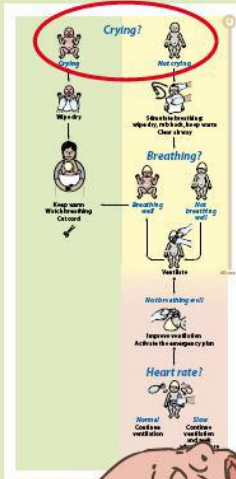

The Golden Minute™ 60 sec

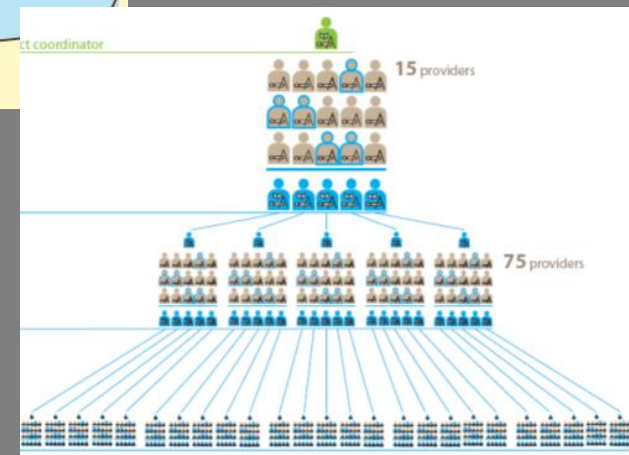

Easy to use and very visual teaching material

Evaluation at birth

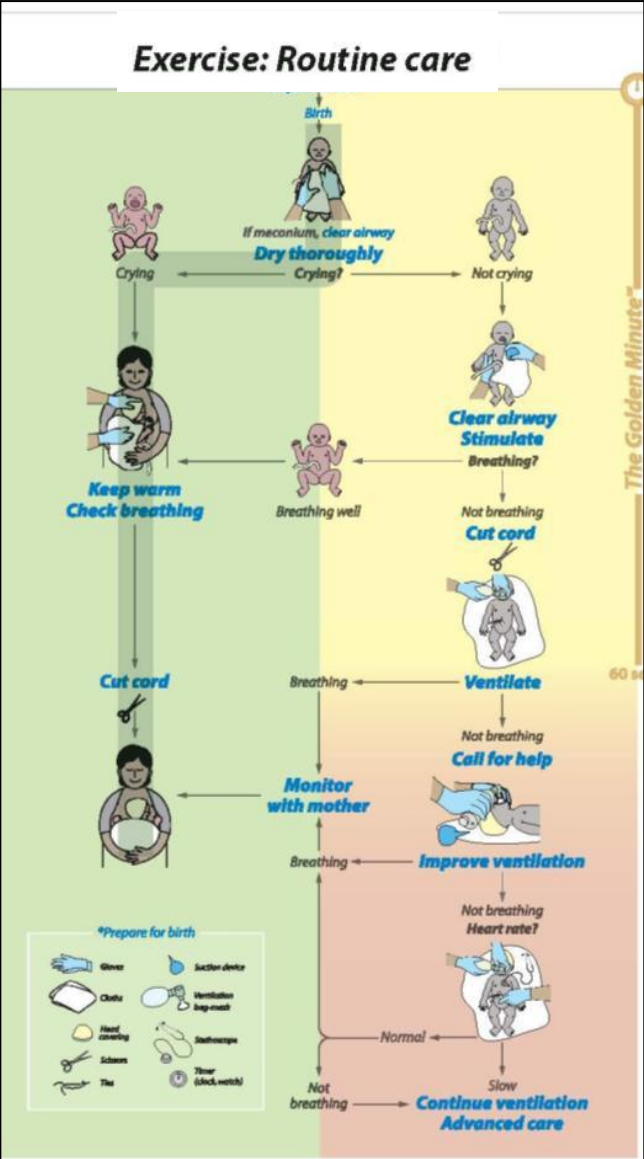

Is the baby crying?

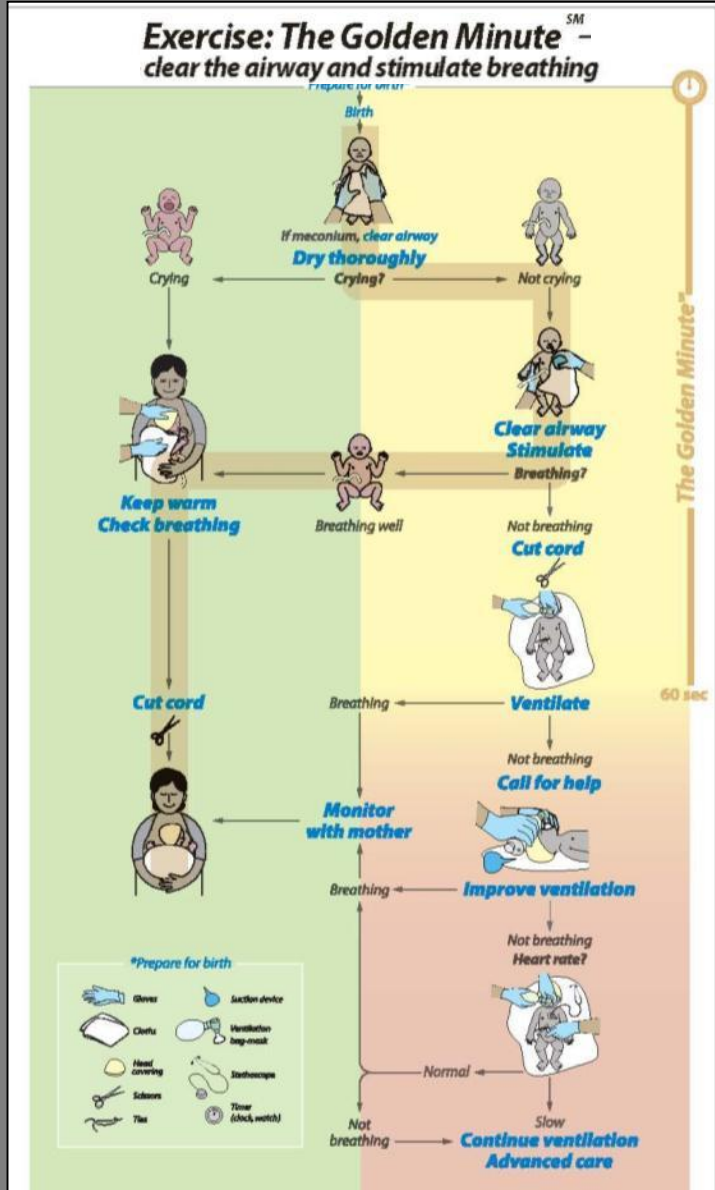

- improves student learning
- facilitates recruiting and training of instructors
- Facilitates a cascade dissemination model

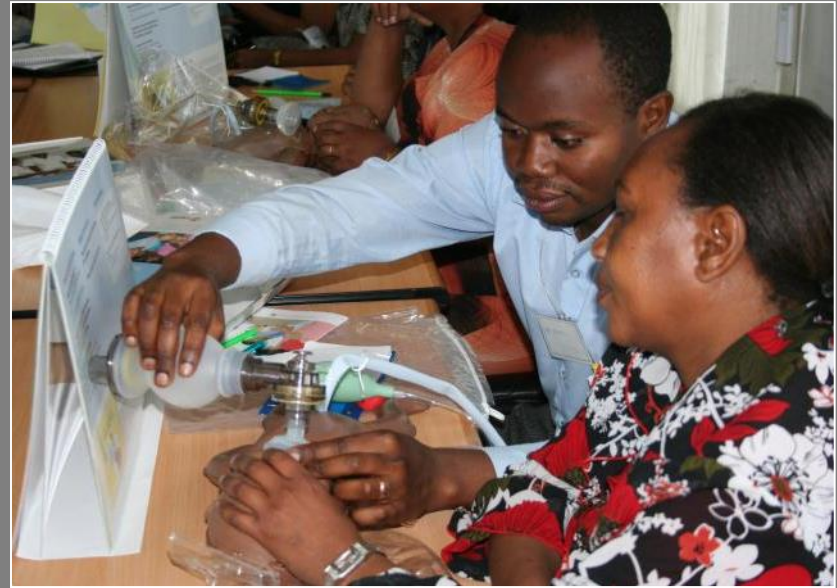

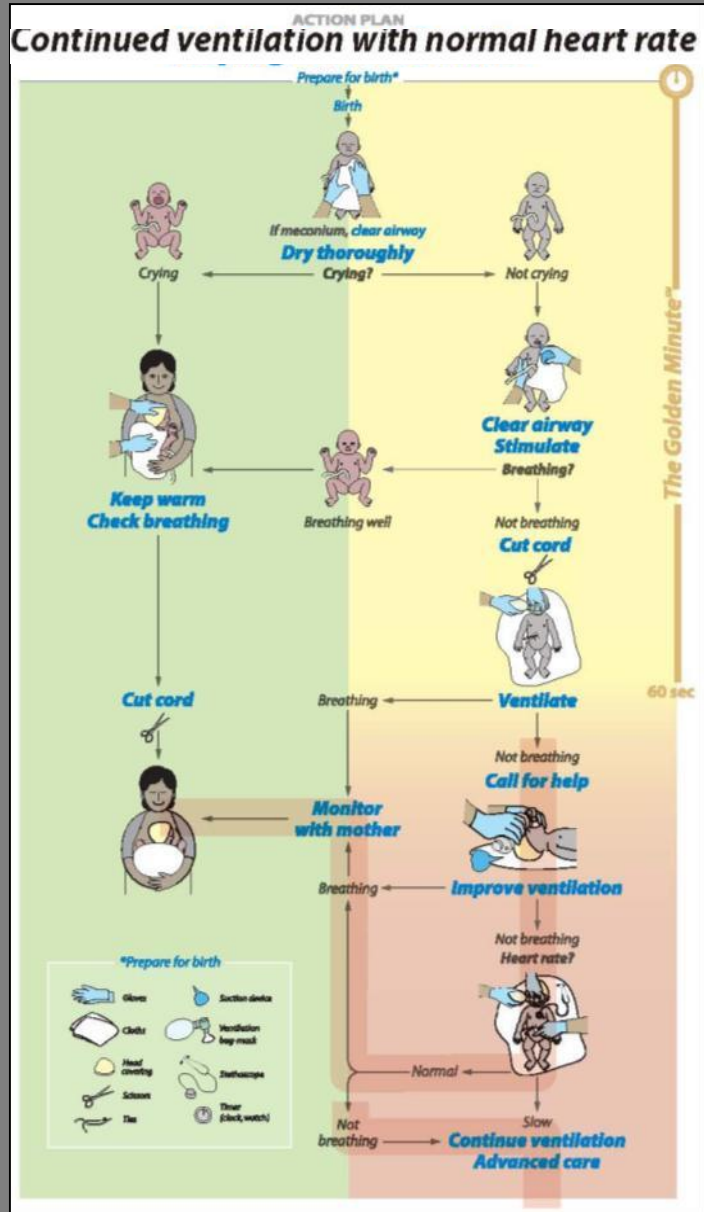

Scenario based simulation

Scenario based simulation

Scenario based simulation

Highly affordable tools allowing maximum practice

In pair initial training

Workplace refresher training

HBB Impact by Mid 2014

Helping Babies Breathe Global Development Alliance

Annual Status Report November 2013

This issue

- P.2 Global Advocacy and Policy
- P.3 HBB at Global Newborn Health Forums
- P.4 System Strengthening
- P.5 HBB Case Studies
- P.6 Towards 2015
- P.7 Essential Care for Every Baby
- P.8 HBB Heroes!

Through our strong and vibrant Helping Babies Breathe (HBB) Global Development Alliance, the following achievements have been possible :

- HBB has been introduced in 60 countries, of which 18 have national plans coordinated by governments
- Increased global demand for newborn resuscitation by training and equipping over 130,000 health workers
- 120,000 bag-mask resuscitators, 150,000 penguin suction devices, and 50,000 NeoNatalie simulators have been supplied on a not-for-profit basis, and another 4,500 HBB training kits have been donated
- Study in Tanzania shows 47% reduction in early neonatal mortality and a 24% reduction in rates of fresh still-birth after HBB was implemented
- HBB have been listed in the WHO document "Essential Interventions, Commodities, and Guidelines", in the UN Commission on Life-Saving Commodities reports, and also as one of 10 breakthrough innovations in a report published at the UN General Assembly in September 2013.

Helping Babies Breathe®

A Global Public-Private Alliance

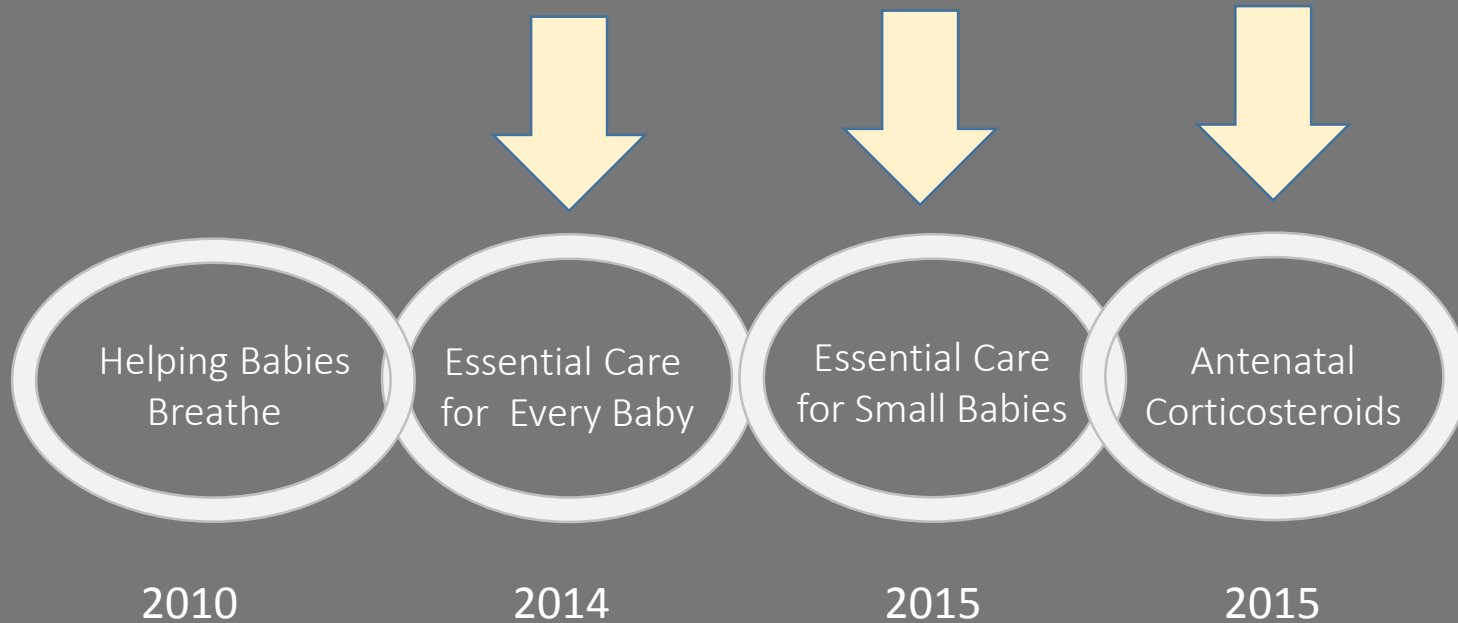

- Introduced in 73 countries
- > 220,000 trained
- 47% reduction in early mo

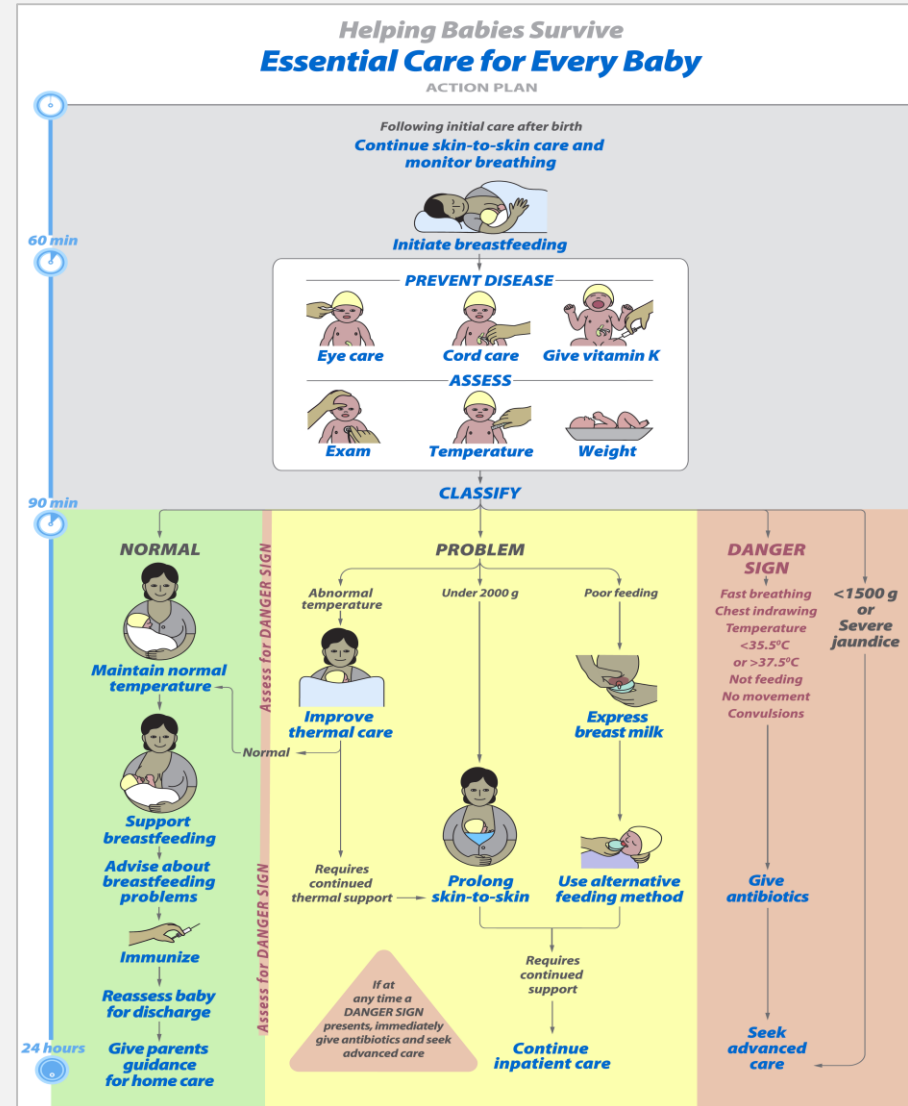

- Helped scale up of *Essential Life-Saving Commodities*

The New Educational Programs

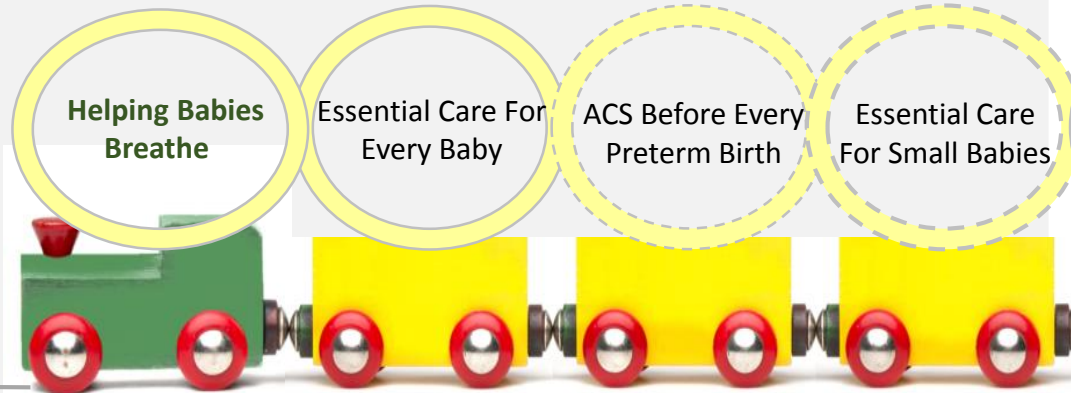

2. Essential Care for Every Baby

3. Essential Care for Small Babies

Helping 100,000 Babies Survive and Thrive

India
Nigeria
Ethiopia

Why can these programs help save many more newborns?

- addresses near 90% of causes of newborn deaths
- Highly focused, aligned training modules
- Evidence based , hands-on simulation training
- Highly affordable training tools
- Peer led, empowers birth attendants and facilitates refresher training
- Locally owned, supported by Public Private Partnerships
