DEAR PARTICIPANTS TO THE 9TH INTERNATIONAL CONFERENCE OF KANGAROO MOTHER CARE

Namaste and Suswagatam.

We offer hearty greetings and warm welcome to our vibrant city of Ahmedabad with the proud heritage of glorious history, rich culture, noble tradition and loving hospitality and a very bright vision for the human development in all spheres of life. We are trying to put all possible efforts to make your stay very useful, pleasant in all possible ways and you carry happy memories with you when you return home safe and sound.

In spite of several limitations and hurdles we think we have been able to prepare a good program and all of you will appreciate the same and find it very useful and practical. Many thanks are due to the International Network of Kangaroo Mother Care and their dedicated members who have had confidence in us and given the opportunity to host this conference which is very precious and equally challenging. It is precious because it offers to provide a message which can globally save thousands of precious lives and also improve their quality of survival. It is challenging because, being so simple and effective, it fails to convince the policy makers to offer the priority due for its proper promotion and the health care providers including the doctors at large find it less glamorous and commercially much less lucrative to encourage in their private or institutional practice. In spite of these the torch bearers and the champions of KMC are gradually making their inroads in convincing people with their scientific evidences and practical experiences.

We have tried to prepare a program including the latest information and a glance will convince you that really it is of a very high standard and covers many aspects of KMC. Dr. Nathalie Charpak, the director of International Kangaroo Foundation has been our guide and advisor throughout. Dr. Regean Tessier the chairperson of the 8th international Conference of KMC at Quebec City Canada, has given us many practical tips. All the members of International network of Kangaroo Mother Care including Dr. Susan Ludington and Dr. Nils Bergman have given an enthusiastic push from the very beginning. Internationally acclaimed experts like Dr. Marilee Allen, Dr. Saroj Saigal, Dr. Cyril Schneider, Dr. Uwe Ewald, Dr. Andrea Guzzetta, Dr. Ruiz and others have readily agreed to spare their valuable time to share their expertise with us. Participation of our own experts like Dr. Vinod Paul, Dr. Siddharth Ramji, Dr. Simin Irani and many others is very valuable for us. All the International and National Participants who have enthusiastically shared their research studies and experiences deserve great appreciation and thanks from all of us.

The support received from the International agencies like UNICEF and Save the Newborn Lives division of MCHIP and USAID is acknowledged with gratitude. Their support in many ways has given a great

boost to our conference. We cannot forget the support given to us by Government of Gujarat in the initial stages to set the ball rolling The support from the management of Pramukhswami Medical College for providing assistance for the accounting and office facilities has been a great help.

Our own National Neonatology Forum has supported us throughout. All the members of Organizing committee have put a lot of efforts to make the event a great success. We cannot forget our treasurer Shri Minesh Shah, our office staff Shri R S Vasava and Shri Mukesh Parmar who have given us enthusiastic and selfless voluntary service for so many hours for the various odd jobs of the conference. There are many many more persons whose help we acknowledge with heartfelt thanks.

In this book you will find the programme copy and also the abstracts of all the guest lectures, oral presentations and the poster presentations for your ready reference. Hope you will find them very informative and useful.

Special thanks for one and all.

Prof.Shashi N.Vani and all the members of the organizing committee
