10th KMC INTERNATIONAL CONFERENCE AGENDA

Welcome remarks

Dear participants on the 10th international Kangaroo Mother Care,

As Chairman, and on behalf of the organizing committee, I am delighted to welcome delegates from all over the world to the *Tenth International Conference on Kangaroo Mother Care that is held in Kigali-Rwanda, from 17-19 November 2014.*

The International Network on **KMC** holds a conference every alternate year with the main objective of promoting current research and knowledge transfer, building up proper attitudes and universalizing the best practice all over the world including developing countries with limited resources where **KMC** should be the prime philosophy of care of Low Birth Weight Infants so that maximum benefit can be achieved.

This year, it is a great honor and privilege for Rwanda to prepare and host the 10th International Conference on Kangaroo Mother Care in Kigali.

In the past few years Rwanda has achieved impressive performances in the reduction of infant mortality including neonatal mortality. Therefore, this conference comes at the right point in time when our objectives are aligned to furthermore reduce infant mortality and move steps closer to the attainment of the Millennium Development Goals. We are confident that this conference will attract high profile researchers and leading experts in the field of Kangaroo Mother Care whose expertise will benefit participants and because of the networking opportunity, will spread across the globe.

Before I conclude, I would like to welcome collaboration and inputs from relevant stakeholders to make this conference a success. As members of the organizing and scientific committees, we would like to wish you a fruitful conference and good time in Rwanda. Once again welcome to the Tenth International Conference on KMC and welcome to the Country of a Thousand Hills.

Dr. Agnes BINAGWAHO
MINISTER OF HEALTH
