

Title: "Kangaroo-baby (KB) in Department of Pediatric of Medical Science School of Santos"

R. Dr. Ernesto Teixeira do Nascimento, Santos - SP. Brasil

Kangaroo-baby (KB) in the Department of Pediatric of Medical Science School of Santos begin in 1.991.

We followed 140 low birth weight new borns with weight from 860g to 1990g. With 5 to 55 days of hospital care.

We do not saw interurrences such as hypotermia and bronchoaspiration.

We consider KB a very good alternative method for LBW in good clinical conditions.
